Chemical Properties

CAS	
Formula	C16H30N4O4S
MW	374.5
Storage	
Structure	 <p>The image shows the chemical structure of Biotin-PEG2-amine. It consists of a biotin moiety (a fused bicyclic system with a sulfur atom and a nitrogen atom) attached to a hexyl chain, which is further connected to a PEG2 chain (two ethylene glycol units) ending in a primary amine group. The structure is labeled with 'DMSO' above it.</p>
