Chemical Properties

CAS	1563-66-2
Formula	C ₁₂ H ₁₅ NO ₃
MW	221.256
Storage	
Structure	 <p>The chemical structure of Carbofuran is shown. It consists of a benzene ring fused to a five-membered furan ring. The furan ring has a methyl group (CH₃) and a hydrogen atom (H) attached to the carbon atom adjacent to the oxygen. The benzene ring has a methoxy group (-OCH₃) and a methylamino group (-NHCH₃) attached to the carbon atom adjacent to the furan ring.</p>
