## Chemical Properties

CAS	1245603-92-2
Formula	C <sub>22</sub> H <sub>20</sub> N <sub>6</sub> O <sub>4</sub>
MW	432.44
Storage	
Structure	 <p>The chemical structure of PF-04937319 is a complex heterocyclic molecule. It features a central benzene ring substituted with a methyl group, a chlorine atom, and a pyridine ring. This pyridine ring is further substituted with a methyl group and a carbonyl group. The carbonyl group is part of an amide linkage to another pyridine ring, which is also substituted with a methyl group. A third pyridine ring is attached to the central benzene ring via a chlorine atom, and it is substituted with a methyl group and a carbonyl group. The carbonyl group is part of an amide linkage to a fourth pyridine ring, which is substituted with a methyl group and a carbonyl group. The carbonyl group is part of an amide linkage to a fifth pyridine ring, which is substituted with a methyl group and a carbonyl group. The carbonyl group is part of an amide linkage to a sixth pyridine ring, which is substituted with a methyl group and a carbonyl group.</p>
