Chemical Properties

CAS	
Formula	C ₂₀ H ₂₂ O ₉
MW	406.39
Storage	
Structure	 <p>The image shows the chemical structure of (E)-Astringin. It consists of a central chiral center (a carbon atom bonded to a hydroxyl group and a hydrogen atom) connected to a glucose ring and a stilbenoid side chain. The side chain features two phenolic rings with hydroxyl groups, connected by a trans-stilbene bridge. The label 'Chiral' is placed above the central carbon atom.</p>
