

Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC32621
Name	Ramiprilat

Tel: +86-21-58447131
Fax: +86-21-61642470

Email:

Chemical Properties

CAS	87269-97-4
Formula	C ₂₁ H ₂₈ N ₂ O ₅
MW	388.46
Storage	
Structure	 <p>The image shows the chemical structure of Ramiprilat, a prodrug of ramipril. It features a bicyclic proline ring system connected via an amide bond to a chiral center. This center is further linked to another chiral center, which is connected to a propanoic acid chain. The propanoic acid chain is substituted with a benzyl group. Stereochemistry is indicated with a wedge bond for the hydrogen on the second chiral center and a dashed bond for the hydrogen on the third chiral center.</p>
