

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC34049
Name	BCA Disodium

**Tel:** +86-21-58447131

## Chemical Properties

CAS	
Formula	C <sub>20</sub> H <sub>10</sub> N <sub>2</sub> Na <sub>2</sub> O <sub>4</sub>
MW	388.29
Storage	
Structure	 <p>The image shows the chemical structure of BCA Disodium. It consists of two benzimidazole rings connected at their 2-positions. Each benzimidazole ring has a carboxylate group (-COO<sup>-</sup>) at the 4-position. The structure is shown as a neutral molecule with two sodium ions (Na<sup>+</sup>) nearby, indicating it is a disodium salt. The SMILES representation is <chem>[Na+].[Na+].O=C(O)c1cnc2ccccc12=C3C=CN4C=CC=CC34</chem>.</p>
