Chemical Properties

CAS	
Formula	C8H15N3O4
MW	217.23
Storage	
Structure	 <p>The chemical structure shows a terminal aldehyde group (H-C=O) attached to a methylene group (-CH2-), which is linked to a polyethylene glycol (PEG) chain consisting of three repeating units of -CH2-CH2-O-. The chain ends with an azide group (-N3).</p>
