Chemical Properties

CAS	
Formula	C ₁₄ H ₂₆ N ₄ O ₇
MW	362.38
Storage	
Structure	 <p>The image shows the chemical structure of N-Boc-Azido-tris(ethylenoxy)-L-alanine. It consists of a central L-alanine moiety where the nitrogen atom is protected by a tert-butoxycarbonyl (Boc) group. The alpha-carbon of the alanine is linked to a chain of three ethyleneoxy units (triethylene glycol), which terminates in an azido group (-N₃).</p>
