Chemical Properties

CAS	
Formula	C ₉ H ₁₇ O ₆ P
MW	252.2
Storage	
Structure	 <p>The chemical structure shows a phosphonic acid group (HO-PO₃H₂) attached to a propargyl-PEG₃ chain. The propargyl group is represented as a terminal alkyne (-CH₂-C≡CH) at the end of a polyethylene glycol (PEG) chain consisting of three repeating units of -CH₂-CH₂-O-.</p>
