Chemical Properties

CAS	
Formula	C17H30O10
MW	394.42
Storage	
Structure	 <p>The image shows the chemical structure of Propargyl-PEG5-beta-D-glucose. It consists of a beta-D-glucopyranose ring connected via its C1 position to a poly(ethylene glycol) (PEG) chain with five repeating units. The PEG chain terminates in a propargyl group (-CH2-C≡CH). The structure is labeled with 'H' and 'OH' groups on the glucose ring and 'CH2' at the end of the PEG chain.</p>
