Chemical Properties

CAS	
Formula	C ₁₅ H ₂₀ O ₅
MW	280.32
Storage	
Structure	 <p>The chemical structure of Artemisitene is a complex polycyclic molecule. It features a central bicyclic core with a fused five-membered ring containing two oxygen atoms. A methyl group (CH₃) is attached to the five-membered ring, labeled as 'Chiral CH₃'. Another methyl group (CH₃) is attached to a side chain, also labeled as 'CH₃'. A methylene group (H₂C) is attached to the bicyclic core. The structure is shown in a perspective view with wedged and dashed bonds to indicate stereochemistry.</p>
