Chemical Properties

CAS	
Formula	C15H30O2
MW	242.4
Storage	
Structure	 <p>The image shows the skeletal structure of 12-methyltetradecanoic acid. It consists of a 14-carbon main chain with a methyl group at the 12th position and a carboxylic acid group at the 1st position. The carboxylic acid group is shown with a carbonyl oxygen (C=O) and a hydroxyl group (O-H). The methyl group is shown as a branch on the 12th carbon. The main chain is labeled with 'H-C' at the left end and 'CH2' at the right end of the chain.</p>
