Chemical Properties

CAS	
Formula	C ₆ H ₁₅ NO
MW	117.19
Storage	
Structure	 <p>The chemical structure shows a six-carbon chain. The first carbon is a methyl group (H₃C). The second carbon is bonded to another methyl group (CH₃). The third carbon is bonded to a hydrogen atom. The fourth carbon is bonded to an amino group (NH₂) with a wedge bond, labeled as 'Chiral'. The fifth carbon is bonded to a hydrogen atom. The sixth carbon is bonded to a hydroxyl group (OH).</p>
