Chemical Properties

CAS	
Formula	C8H10N2O
MW	150.18
Storage	
Structure	 <p>The chemical structure of 1-Benzylurea is shown. It consists of a benzene ring attached to a methylene group (-CH2-), which is further attached to a nitrogen atom (-NH-). This nitrogen atom is part of a urea group (-NH-C(=O)-NH2), where the carbonyl oxygen is double-bonded to the carbon, and the other nitrogen is bonded to two hydrogen atoms.</p>
