Chemical Properties

CAS	
Formula	C ₂₃ H ₂₉ F ₃ O ₆
MW	458.47
Storage	
Structure	 <p>The image shows the chemical structure of (+)-Fluprostenol. It features a central cyclopentane ring with two hydroxyl groups. One of these hydroxyl groups is part of a side chain that includes a double bond and a carboxylic acid group. The other side chain is a propyl chain with a hydroxyl group and an ether linkage to a 4-(trifluoromethyl)phenyl group. The trifluoromethyl group is labeled 'Chiral'.</p>
