## Chemical Properties

CAS	
Formula	C <sub>10</sub> H <sub>8</sub> N <sub>4</sub> O <sub>4</sub>
MW	248.2
Storage	
Structure	 <p>The chemical structure of Altimol is shown. It consists of a central imidazole ring. One nitrogen atom of the imidazole ring is bonded to a para-substituted phenyl ring, which has a nitro group (-NO<sub>2</sub>) at the para position. The other nitrogen atom of the imidazole ring is bonded to a methyl group (-CH<sub>3</sub>) and a nitro group (-NO<sub>2</sub>).</p>
