Chemical Properties

CAS	
Formula	C ₂₂ H ₃₈ O ₅
MW	382.54
Storage	
Structure	 <p>The image shows the chemical structure of Alprostadil ethyl ester. It features a central cyclopentane ring with a hydroxyl group and a propyl chain on one side, and a long side chain on the other. The side chain includes a double bond, a hydroxyl group, and an ethyl ester group. The structure is labeled with 'H', 'O', and 'C' atoms.</p>
