Chemical Properties

CAS	
Formula	C ₁₆ H ₂₁ N ₃ O ₅ S
MW	367.42
Storage	
Structure	 <p>The image shows the chemical structure of alpha-Aminobenzylpenicilloic acid. It features a central beta-lactam ring fused to a five-membered thiazolidine ring. Attached to the beta-lactam ring is a phenylacetamido group (a benzene ring connected to a CH2 group, which is connected to an NH-C(=O) group). The thiazolidine ring has a methyl group and a penicilloic acid side chain (a CH2 group connected to a CH group with a carboxylic acid group and a hydroxyl group).</p>
