## Chemical Properties

CAS	
Formula	C7H16N2O2
MW	160.22
Storage	
Structure	 <p>The chemical structure shows a 3-aminopropyl chain attached to a trimethylammonium group. The amino group is on a chiral center, indicated by a dashed bond. The trimethylammonium group is labeled 'Chiral' and has three methyl groups attached to a positively charged nitrogen atom. The propyl chain is attached to a carboxylate group (COO<sup>-</sup>).</p>
