Chemical Properties

CAS	
Formula	C ₂₃ H ₂₅ N ₅ O ₄ S ₃
MW	531.66
Storage	
Structure	 <p>The chemical structure shows a central benzimidazole ring system. One nitrogen atom is substituted with a 2-(methylthio)ethyl group. The other nitrogen atom is substituted with a 2-(methylthio)ethyl group and a 4-(propylsulfamoyl)phenyl group. The propylsulfamoyl group is shown as a propyl chain attached to a sulfonamide group (-SO₂NH-), which is further attached to a propyl chain. The structure is drawn with some atoms labeled as 'H-C' and 'C-H'.</p>
