CAS	
Formula	C ₁₇ H ₁₄ N ₂ O ₇
MW	358.31
Storage	
Structure	 <p>The chemical structure of Obafluorin is shown. It consists of a central five-membered ring containing two oxygen atoms and a carbonyl group. This ring is substituted with a 2,4-dihydroxyphenyl group, a methoxy group, and a 4-(methanesulfonyl)phenyl group. The label 'Obafluorin' is placed above the structure.</p>
