Chemical Properties

CAS	
Formula	C ₂₂ H ₂₂ N ₂ O ₈
MW	442.42
Storage	
Structure	 <p>The image shows the chemical structure of β-Apo-Oxytetracycline. It is a complex polycyclic molecule consisting of a tetracycline core with a dimethylamino group at the 4-position and a dimethylaminoethyl side chain at the 7-position. The structure includes multiple hydroxyl groups and a dimethylamino group. A label 'CHiral' with a vertical line is positioned above the dimethylaminoethyl side chain, indicating its stereochemistry.</p>
