Chemical Properties

CAS	
Formula	C ₃₅ H ₄₀ N ₄ O ₄
MW	580.73
Storage	
Structure	 <p>The image shows the chemical structure of N-methyl Mesoporphyrin IX. It is a porphyrin ring system with a central nitrogen atom bonded to a methyl group (N-CH₃). The ring is substituted with four propionic acid side chains (-CH₂-CH₂-COOH) and four methyl groups (-CH₃) at the 2, 3, 7, and 8 positions.</p>
