Chemical Properties

CAS	
Formula	C ₁₆ H ₁₄ N ₂ O ₄
MW	298.3
Storage	
Structure	 <p>The chemical structure shows a central benzene ring fused to two pyridine rings. The left pyridine ring has a methyl group (CH₃) on the nitrogen and a hydroxymethyl group (-CH₂OH) at the 4-position. The right pyridine ring has a methyl group (CH₃) at the 4-position. An oxygen atom is bonded to the 5-position of the benzene ring, which is also bonded to the nitrogen of the right pyridine ring.</p>
