## Chemical Properties

CAS	
Formula	C <sub>28</sub> H <sub>26</sub> N <sub>5</sub> O
MW	467.55
Storage	
Structure	 <p>The chemical structure shows a benzimidazole ring system connected via a methylene group to a secondary amine. This secondary amine is further connected to a primary amine, which is linked to a propyl chain. The propyl chain is attached to another secondary amine, which is connected to a carbonyl group. The carbonyl group is part of a benzamide derivative, where the benzene ring is substituted with a 4-ethynylphenyl group. The ethynyl group is represented as -C≡CH.</p>
