Chemical Properties

CAS	
Formula	C ₁₈ H ₂₄ N ₄ O ₇ S ₂
MW	472.53
Storage	
Structure	 <p>The image shows the chemical structure of Hydroxystilbamidine. It consists of a central stilbene core (two phenyl rings connected by a double bond). One phenyl ring is substituted with a hydroxyl group (-OH) and a methylamino group (-NHCH₃). The other phenyl ring is substituted with a methylamino group (-NHCH₃) and a bis(2-hydroxyethyl)ammonium group (-N⁺(CH₂CH₂OH)₂CH₃), which is shown as a zwitterion with a positive charge on the nitrogen and a negative charge on one of the oxygen atoms of the hydroxyl groups.</p>
