

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC36464
Name	Avermectin B1a monosaccharide

**Tel:** +86-21-58447131  
**Fax:** +86-21-61642470

## Chemical Properties

CAS	
Formula	C <sub>41</sub> H <sub>60</sub> O <sub>11</sub>
MW	728.92
Storage	
Structure	 <p>The image shows the chemical structure of Avermectin B1a monosaccharide. It is a complex macrocyclic lactone with a 14-membered ring. The structure features several stereocenters, a lactone ring, and a monosaccharide moiety attached to the macrocycle. The monosaccharide is a pyranose ring with various substituents, including hydroxyl groups and a methyl group. The overall structure is highly complex and characteristic of avermectin derivatives.</p>
