| Structure |  <p>The chemical structure of Spiromesifen is a complex molecule. It features a central five-membered ring containing an oxygen atom. This ring is substituted with a cyclohexane ring, a methyl group, and a carbonyl group. The cyclohexane ring is further substituted with a methyl group and a propyl chain. The propyl chain is terminated by a methyl group. The methyl group on the cyclohexane ring is also substituted with a methyl group. The carbonyl group is part of a larger functional group that includes a methyl group and a propyl chain.</p> |
