Chemical Properties

CAS	
Formula	C ₂₁ H ₂₆ CLNO ₂
MW	359.89
Storage	
Structure	 <p>The image shows the chemical structure of Piperidolate hydrochloride. It consists of a piperidine ring (a six-membered ring with one nitrogen atom) connected via an ester linkage to a biphenyl group. The piperidine ring has a methyl group attached to the nitrogen atom. The biphenyl group consists of two benzene rings connected at the 1-position of one ring and the 2-position of the other. The ester oxygen is attached to the 4-position of the first benzene ring. The structure is shown as a salt with a hydrochloride counterion (H+ Cl-).</p>
