| Structure |  <p>The image shows the chemical structure of butyl benzoate. It consists of a benzene ring attached to a carbonyl group (C=O), which is further attached to an oxygen atom. This oxygen atom is connected to a four-carbon alkyl chain (butyl group). The structure is drawn in a skeletal format with a benzene ring on the right, a carbonyl group pointing up, an oxygen atom pointing left, and a four-carbon chain extending to the left, ending in a methyl group labeled 'H-C'.</p> |
