## Chemical Properties

CAS	
Formula	C13H18CLNO
MW	239.74
Storage	
Structure	 <p>The chemical structure shows a pentanoic acid derivative with a methyl group at the 4-position and an amide linkage to a 2,4-dichlorophenyl ring. The amide nitrogen is bonded to a hydrogen atom. The methyl group is labeled 'C H<sub>3</sub>', the amide hydrogen is 'H', and the chlorine atoms are 'Cl'.</p>
