Chemical Properties

CAS	
Formula	C ₄ H ₁₀ O ₂
MW	90.12
Storage	
Structure	 <p>The image shows the chemical structure of tert-butyl hydroperoxide. It consists of a central carbon atom bonded to three methyl groups (H₃C) and one hydroperoxy group (-O-OH). The methyl groups are arranged in a trigonal planar fashion around the central carbon, and the hydroperoxy group is attached to the same carbon atom.</p>
