Chemical Properties

CAS	72803-02-2
Formula	C ₁₉ H ₂₁ N ₃ O ₅
MW	371.393
Storage	
Structure	 <p>The chemical structure shows a central benzimidazole ring system. The benzimidazole core consists of a benzene ring fused to an imidazole ring. Two carbonyl groups are attached to the 2-position of the imidazole ring, each linked via an ester bond to a methoxy group (-OCH₃). The 4-position of the imidazole ring has a methyl group (-CH₃) and a hydrogen atom (-H) attached. The 5-position of the imidazole ring has a methyl group (-CH₃) and a hydrogen atom (-H) attached.</p>
