Chemical Properties

CAS	7512-17-6
Formula	C ₈ H ₁₅ NO ₆
MW	221.209
Storage	
Structure	 <p>The image shows the chemical structure of Acetylglucosamine (2-acetylglucosamine). It consists of a glucose ring with an acetyl group (-NHCOCH₃) attached to the C2 position. The C1 position is a CH₂OH group. The C3, C4, and C6 positions have hydroxyl groups (-OH) attached. The C5 position has a hydroxyl group (-OH) and a hydrogen atom (-H) attached. The acetyl group is labeled 'Chiral'.</p>
