Chemical Properties

CAS	73080-51-0
Formula	C ₂₀ H ₂₁ NO ₅
MW	355.39
Storage	
Structure	 <p>The chemical structure of Repirinast is a complex molecule. It features a central benzene ring with two methyl groups (CH₃) at the 3 and 4 positions. Attached to the ring are a pyridinone ring, a pyrazole ring, and a propyl ester group. The pyridinone ring has a carbonyl group (C=O) at the 2-position and a nitrogen atom (NH) at the 3-position. The pyrazole ring has a carbonyl group (C=O) at the 3-position and is linked to the propyl ester group at the 4-position. The propyl ester group consists of a propyl chain (CH₂-CH₂-CH₃) attached to an oxygen atom, which is in turn attached to a carbonyl group (C=O).</p>
