## Chemical Properties

CAS	69-81-8
Formula	C <sub>10</sub> H <sub>12</sub> N <sub>4</sub> O <sub>3</sub>
MW	236.231
Storage	
Structure	 <p>The chemical structure of Carbazochrome is shown. It consists of a benzene ring fused to a five-membered ring containing a nitrogen atom with a methyl group (CH<sub>3</sub>) and a hydroxyl group (OH). The benzene ring has a carbonyl group (C=O) at the 4-position and a hydrazide group (-NH-NH-C(=O)-NH<sub>2</sub>) at the 2-position.</p>
