Chemical Properties

CAS	118159-48-1
Formula	C ₁₉ H ₁₈ O ₉
MW	390.344
Storage	
Structure	 <p>The chemical structure of Bicyclol is a complex polycyclic molecule. It features two fused benzene rings, each substituted with a methoxy group (-OCH₃) and a hydroxyl group (-OH). The two rings are connected by a central oxygen atom, forming a bicyclic system. The structure is shown in a 2D representation with various substituents labeled as H₃C-O, H-O, and O-CH₃.</p>
