

## Certificate of Analysis

Target	Products>>Novel inhibitors
Cat.No	DC32329
Name	Isovitexin 2''-O- $\beta$ -glucoside

**Tel:** +86-21-58447131  
**Fax:** +86-21-61642470

## Chemical Properties

CAS	60767-80-8
Formula	C <sub>27</sub> H <sub>30</sub> O <sub>15</sub>
MW	594.522
Storage	
Structure	 <p>The image shows the chemical structure of Isovitexin 2''-O-<math>\beta</math>-glucoside. It consists of a flavone core (Isovitexin) linked to a glucose molecule at the 2'' position. The glucose is in its cyclic <math>\beta</math>-D-glucopyranoside form. The flavone core has a 4-hydroxyphenyl group at the 7-position and a 3,5-dihydroxyphenyl group at the 2-position. The glucose molecule has hydroxyl groups at the 2, 3, 4, and 6 positions.</p>
