Chemical Properties

CAS	53780-34-0
Formula	C ₁₁ H ₁₃ F ₃ N ₂ O ₃ S
MW	310.2912
Storage	
Structure	 <p>The chemical structure of Mefluidide is a benzene ring substituted with a trifluoromethyl group (-CF₃), two methyl groups (-CH₃), and two acetamido groups (-NHCOCH₃). A sulfonamide group (-SO₂NH-) is attached to the ring, with the nitrogen atom of the sulfonamide group also bonded to the trifluoromethyl group.</p>
