Chemical Properties

CAS	2029049-79-2
Formula	C ₂₁ H ₂₁ F ₃ N ₂ O ₃
MW	406.4052
Storage	
Structure	 <p>The chemical structure shows a bicyclic amine (1,2,3,4-tetrahydroquinoline) connected via a secondary amide to a propanoic acid derivative. This is further linked via another secondary amide to a benzene ring. The benzene ring has a hydroxyl group and a trifluoromethyl group (CF₃) at the para position. A 'Chiral' label is present above the trifluoromethyl group.</p>
