Chemical Properties

CAS	32302-76-4
Formula	C ₁₂ H ₁₉ N ₃ O ₆
MW	301.299
Storage	
Structure	 <p>The chemical structure shows a tripeptide backbone. The N-terminus is a proline ring (a five-membered ring with one nitrogen atom). The C-terminus is a glutamic acid side chain. The middle residue is a glycine residue. The structure is labeled with 'Chiral' and 'NH₂' near the proline ring. The SMILES string is <chem>NC(=O)C1CCN1C(=O)CNC(=O)CC(O)C(=O)O</chem>.</p>
