Chemical Properties

CAS	1709-70-2
Formula	C ₅₄ H ₇₈ O ₃
MW	775.2
Storage	
Structure	 <p>The chemical structure of lonox 330 is a complex polycyclic molecule. It features a central benzene ring substituted with three phenyl groups. Each phenyl group is further substituted with methyl groups and hydroxyl groups. The structure is highly symmetrical and contains multiple stereocenters.</p>
