## Chemical Properties

CAS	84472-85-5
Formula	C <sub>9</sub> H <sub>11</sub> N <sub>5</sub> O <sub>4</sub>
MW	253.218
Storage	
Structure	<p>Chiral</p>  <p>The chemical structure shows a chiral molecule consisting of a 5-membered ring with an oxygen atom and a nitrogen atom. The nitrogen atom is part of a guanidinium group (N<sup>+</sup>=N<sup>-</sup>-N<sup>+</sup>). The ring is substituted with a hydroxyl group (OH) and a nitrogen atom that is part of a 6-membered ring containing two carbonyl groups (C=O) and a double bond. The structure is labeled as 'Chiral'.</p>
