Chemical Properties

CAS	66063-05-6
Formula	C ₁₉ H ₂₁ ClN ₂ O
MW	328.84
Storage	
Structure	 <p>The chemical structure of Pencycuron is shown. It consists of a central amide group (-NH-C(=O)-) where the nitrogen is bonded to a phenyl ring and the carbonyl carbon is bonded to a cyclopentyl ring. The carbonyl oxygen is double-bonded to the carbon. The nitrogen is also bonded to a methylene group (-CH₂-) which is further bonded to a para-chlorophenyl ring.</p>
