## Chemical Properties

CAS	385769-84-6
Formula	C <sub>21</sub> H <sub>18</sub> N <sub>4</sub> O <sub>4</sub>
MW	390.399
Storage	
Structure	 <p>The chemical structure of Aminotadalafil is shown. It features a central piperazine ring system. One nitrogen atom of the piperazine is substituted with a 2,3-dihydro-1H-indol-5-ylmethyl group. The other nitrogen atom is substituted with a 2-amino-1,3-dioxol-5-ylmethyl group. The piperazine ring also has two carbonyl groups (C=O) attached to it, one on each of the carbons adjacent to the nitrogens. The structure is labeled 'Clinal'.</p>
