Chemical Properties

CAS	267402-71-1
Formula	C ₂₄ H ₂₈ N ₆ O ₂
MW	432.528
Storage	
Structure	 <p>The chemical structure of Myoseverin is a complex heterocyclic molecule. It features a central pyrimidopyrimidine ring system. One nitrogen atom in the ring is substituted with a methyl group (CH₃). Two other nitrogen atoms are part of exocyclic rings: one is a 5-membered ring with a methyl group, and the other is a 6-membered ring with a methyl group. Additionally, there are two methoxy groups (-OCH₃) attached to the structure via ether linkages.</p>
