Chemical Properties

CAS	1393371-39-5
Formula	C ₁₇ H ₁₄ CLNO ₃ S
MW	347.813
Storage	
Structure	 <p>The chemical structure shows a benzothiazole ring system with a chlorine atom at the 6-position, connected at the 2-position to a para-substituted benzene ring. This benzene ring is further connected via an ether linkage to a propionic acid side chain. The side chain consists of a methylene group (CH₂), a methoxy group (OCH₃), and a carboxylic acid group (COOH).</p>
