Chemical Properties

| | |
|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CAS | 34042-85-8 |
| Formula | C ₁₃ H ₁₁ N ₃ O ₄ S ₂ |
| MW | 337.37 |
| Storage | |
| Structure |  <p>The chemical structure of Sudoxicam is a benzothiazine derivative. It features a benzene ring fused to a six-membered ring containing a sulfur atom and a nitrogen atom. The sulfur atom is double-bonded to an oxygen atom. The nitrogen atom is bonded to a methyl group and a carbonyl group. The carbonyl group is further bonded to a thiazole ring. A hydroxyl group is attached to the benzothiazine ring system.</p> |
