Chemical Properties

CAS	40786-08-1
Formula	C ₂₇ H ₂₉ NAO ₉
MW	520.5098
Storage	
Structure	 <p>The image shows the chemical structure of FPL-55712 sodium salt. It consists of two substituted benzene rings connected by a central ethylene bridge. Each benzene ring has a carboxylate group (-COO⁻) and a hydroxyl group (-OH) attached. The sodium ion (Na⁺) is shown as a counterion. The structure is drawn in a skeletal format with explicit hydrogen and oxygen atoms.</p>
