## Chemical Properties

CAS	10356-76-0
Formula	C <sub>9</sub> H <sub>12</sub> FN <sub>3</sub> O <sub>4</sub>
MW	245.21
Storage	
Structure	 <p>The chemical structure shows a pyridine ring substituted with a fluorine atom (F) and an amino group (H<sub>2</sub>N). The nitrogen atom of the pyridine ring is connected via a dashed bond to the nitrogen atom of a five-membered furanose ring. The furanose ring has a hydroxyl group (OH) at the 2-position and a CH<sub>2</sub>OH group at the 3-position.</p>
